# Firmware Update Manual

NOTE: Only follow this guide if your UR robot's software is < V. 3.3! - If V.3.3 or above use URcap to update.

Follow these steps to firmware update the Gripper. Ensure that the file "**FW_update_X_X_X.script**" is accessible from the robot e.g. via **USB\ON\Technical scrips\FW_update_X_X_X.scripts**
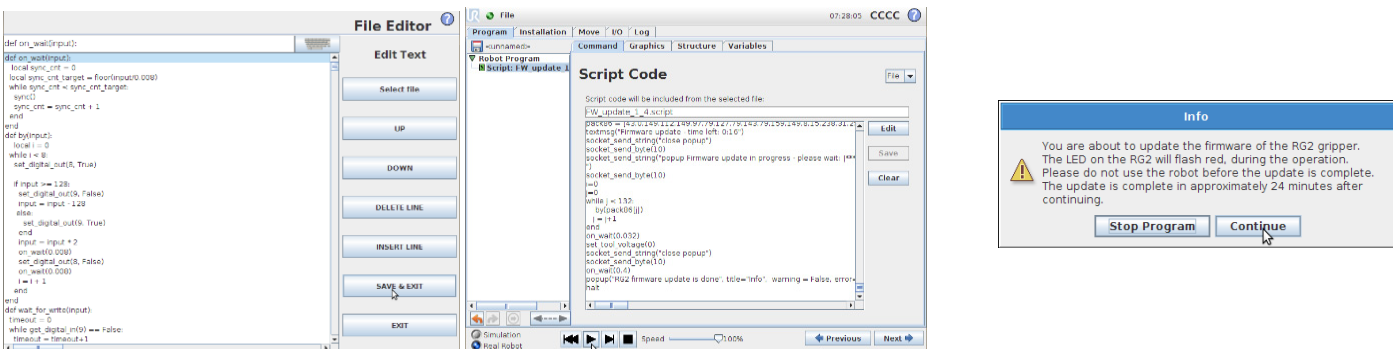

1. Ensure that the Gripper is properly connected to the robot tool connector and then **power ON** the robot.

2. Select **Empty Program**   3. Insert a **Script Code**   4. Go to the **command tap.** In the **dropdown menu** chose **file**

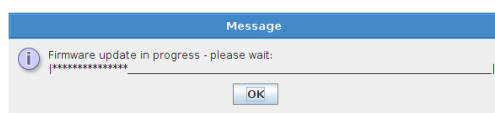

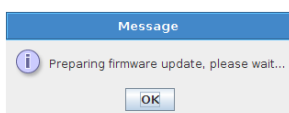

5. Click **Edit**   6. Click **Select File**   7. Chose **FW_update_X_X_X.script.** Click **Open**

8. Click **SAVE & EXIT**   9. Click **Play**   10. Click **Continue**

11. **Do not use the robot** while the Firmware update is I progress it will take some time (you don't need to click OK) – Please wait…   12. When done, Click **Continue**
